

HISTORY OF MEDICINE

A Correlative Text, Arranged According to Subjects

LIBRARY OF THE
535 NORTH DEARBORN STREET

By

CECILIA C. METTLER, A.B., Ed.B., A.M., Ph.D.

*Late Assistant Professor of Medical History, University of Georgia, School of
Medicine, and late Associate in Neurology, College of Physicians and Surgeons,
Columbia University*

Edited by

FRED A. METTLER, A.M., M.D., Ph.D.

*Associate Professor of Anatomy, College of Physicians and Surgeons,
Columbia University*

FOREWORD	xxix

1

Anatomy and Physiology, to the End of the Middle Ages

ANATOMY AND PHYSIOLOGY TO THE TIME OF THE GREEKS.	1
Primitive Man, 1; In Egypt, 4; In Syria, 4; The Persians, 5; In the Orient, 5.	
GRECIAN ANATOMY AND PHYSIOLOGY	7
Aesculapius, 7; Early Greek Philosophers, 8; Hippocrates, 11; Socrates and Plato, 14; Aristotle the Peripatetic, 15.	
ANATOMY AND PHYSIOLOGY IN ALEXANDRIA	17
Herophilus and Erasistratus, 18.	
ROMAN ANATOMY AND PHYSIOLOGY.	20
Celsus, 21; Marinus, 21; Rufus and Soranus of Ephesus, 22; Aretaeus, 22; Galen, 23.	
ANATOMY AND PHYSIOLOGY IN THE MIDDLE AGES	29
Byzantium, 30; The Arabs Translate, 30; The "Civitas Hippocratica," 32; Constantinus Africanus Introduces Arabic Medicine, 33; Bologna Restores Human Dissection, 33; Mundinus, the Herald of Anatomy, 34; Montpellier, 35; Leonardo da Vinci, 36; Two Anatomists of Padua, 37; Anatomy and Physiology at Bologna, 37; Paris, 38.	
ANATOMY AND PHYSIOLOGY IN THE SIXTEENTH CENTURY.	40
The Anatomic Treatises of Estienne and Canano, 41; Vesalius, Calcar, and the "De Fabrica," 41; The Unfortunate Servetus, 45; Eustachio, 45; Colombo, 46; Fallopio, 46; Aranzi and Botallo, 47; Coiter, Varolio, Piccolomini, and Du Laurens, 48; Cesalpino, Fabricius ab Aquapendente, and Plater, 50; Anatomy in England, 51.	

2

Anatomy in the Modern Period

ANATOMY IN THE SEVENTEENTH CENTURY	59
Anatomy of the Lymphatics, 60; Anatomy of the Glands, 62; Study of the Neural System in the Seventeenth Century, 65; Injection and Corrosion Technics, 68; Malpighi and the Capillary Anastomosis, 70; Microscopic Anatomy, 73.	
ANATOMY IN THE EIGHTEENTH CENTURY.	75
The Italian School, 77; The Dutch School, 80; Anatomy in France, 81; Anatomy in Scotland, 82; Anatomy in England, 82; Anatomy in Germany, 85; Anatomy in America, 87.	
ANATOMY IN THE FIRST HALF OF THE NINETEENTH CENTURY	89
General Anatomists, 90; Anatomy in America, 93; Histology, 99; Embryology, 105.	

3

Physiology in the Modern Period

PHYSIOLOGY IN THE SEVENTEENTH CENTURY.	113
Circulation of the Blood, 113; Lymphatic Absorption, 116; Metabolism, 117; The Iatrophysicists and Iatrochemists: Muscular Contraction and Digestion, 117; Growth of Animism, 127; Respiration and Further Work on the Circulation, 128.	
PHYSIOLOGY IN THE EIGHTEENTH CENTURY	131
Haller, 131; Further Work on Digestion, 134; Further Work on the Circulation, 135; Respiration, 138; Neural Function, 139.	
PHYSIOLOGY IN THE NINETEENTH CENTURY	141
Müller, Magendie, Bernard, and Ludwig, 141; Cardiovascular Physiology, 147; Neurophysiology, 151; Digestive Function, 159.	

4

Pharmacology

PHARMACOLOGY TO THE TIME OF THE GREEKS	173
Character of Primitive Therapeutics, 173; Babylo-Assyrian Practice, 173; Egyptian Practice, 174.	
THE MATERIA MEDICA OF THE GREEKS.	175
THE HINDUS.	177

THE CHINESE	177
PHARMACOLOGY IN ROME	178
Early Roman Pharmacology, 178; Dioscorides, 179; Pliny, 181; Aretaeus, 181; The Four Elements and Humors, 182; Galen, 183.	
BYZANTINE MATERIA MEDICA.	185
ARABIC WRITERS.	189
MEDIEVAL PHARMACOLOGY	194
CHEMISTRY IN PHARMACY.	201
ANTIMONY, PARACELSUS, AND PATIN	202
IRRATIONAL AND FRAUDULENT INFLUENCES IN SIXTEENTH-CENTURY MATERIA MEDICA.	203
TURQUET DE MAYERNE AND SOME SEVENTEENTH-CENTURY REFORMS	205
Quinine, 206; Transfusion, 207.	
EIGHTEENTH CENTURY	208
Physiologic Action, 209; Digitalis, 211; Corrosive Sublimate, 211; Ether, 212; Opium, 212; Pharmacology in America, 213.	
NINETEENTH CENTURY	214
Homeopathy and Therapeutic Nihilism, 215; Pharmacology in America in the Early Part of the Nineteenth Century, 216; Anesthesia, 218; The Salicylates, 221; Chemotherapy, 223.	

5

Pathology and Bacteriology

CONCEPTIONS OF PATHOLOGY IN THE ANCIENT WORLD.	233
Paleopathologic Evidences of Disease, 233; Pre-Grecian Theories of Disease, 234; Pre-Grecian Sanitation, 234; Disease in the Greek World, 235; Disease a Problem of the State, 238; Pathology in the "De Medicina," 241; The Pathology of Galen, 242; Contagion, 243; Mysticism and the Degradation of Hygienic Principles, 245.	
THE MIDDLE AGES	246
The Arabs, 246; New Evidences of Contagion, 247.	
THE SIXTEENTH CENTURY.	248
Fracastoro, 248; Physical Ravages of Disease, 249.	
PATHOLOGY IN THE SEVENTEENTH CENTURY	251
PATHOLOGY IN THE EIGHTEENTH CENTURY.	252

THE NINETEENTH CENTURY	254
Pathology in the Nineteenth Century, 254; The Parisian School, 257; The Viennese and German Physiologic Schools of Pathology, 258; Beginnings of Bacteriology, 260; Cellular Pathology, 267; Animal Vectors in the Further Development of Public Health, 270.	

6

Physical Diagnosis

PHYSICAL DIAGNOSIS	281
The Medicine Man Decides About a Tribesman, 282; Diagnosis Among the Ancients, 282; Diagnosis at the Asclepieae, 283; The East, 287; An Alexandrian Is Sick, 287; Galen and Refinements in the Knowledge of the Pulse, 287; Aretaeus, Percussion, Hemoptysis, Hematemesis, Obstructive Jaundice, Ascites Versus Tympanites, the Signs of Tuberculosis, 290; Physical Diagnosis Among the Byzantines and Arabs, 292; Uroscopy, 293; Beginnings of Mensuration, 295; Inequality of the Radial Pulses, 296; Thoracic Percussion, 296; Further Progress in the Improved Technics of Physical Diagnosis, 306; The Viennese School, 307; Contributions of the Preclinical Sciences to the Problems of Diagnosis, 310; Thermometry, 311; Sphygmomanometry, 313; Adjuncts to Methods of Physical Diagnosis, 314.	

7

Medicine

PRE-GRECIAN MEDICINE.	319
Stages in the Development of Internal Medicine, 319; Primitive Medicine, 319; Babylo-Assyrian Medicine, 320; Medicine in Egypt, 321.	
MEDICINE IN GREECE.	322
Sources of Greek Medicine, 322; Identification of Early Descriptions of Diseases, 323; Etiology in Greek Medicine, 324; The Humoral Theory, 324; Fevers, 324; The Plague of Thucydides, 325; Types of Fevers, 325; Prognosis in Fevers, 326; Indicative and Critical Days, 326; Grecian Therapy, 327; Therapy in Fevers, 328; Local Diseases, 329; The Dogmatists, 329.	
MEDICINE IN ALEXANDRIA.	330
The Empirics, 331.	
MEDICINE IN THE FAR EAST.	332
MEDICINE IN CHINA	334
MEDICINE IN ROME	334
Asclepiades, 334; Methodism, 336; Pneumatism, 336; Celsus, 336; Galen, 342; Aretaeus, 347.	
BYZANTINE MEDICINE.	350
Byzantine Conceptions of Fever, 351; Paul of Aegina, 352.	

ARABIC MEDICINE	354
Extension of Medical Care to the Poor, 354; Nature of Arabic Medicine, 355; Rhazes, 355; Haly Abbas and Avicenna, 357.	
MEDIEVAL MEDICINE	358
Diffusion of Arabic Influences, 358; Albucasis, 358; Avenzoar and Averroës, 359; Scholasticism, 360; Early European Universities, 361; Influence of Scholasticism on Medicine, 361; Roger Bacon and Experimentalism, 362; Bubonic Plague, 363; Social Condition of Medicine, 364.	
SIXTEENTH CENTURY	365
Johann Lange and Anachromatic and Hypochromatic Anemias, 365; Sweating Sickness, 367; Typhus, 367; Respiratory Diseases, 368; Cardiac Diseases, 368; Scurvy (Multiple Deficiency Disease), 368; Allergy, 369; Mountain Sickness, 369; Other Sixteenth-century Descriptions, 370; New Influences, 370.	
SEVENTEENTH CENTURY.	371
Bedside Teaching of Clinical Medicine, 371; Changes in Established Conceptions of Disease, 372; Jean Riolan and the Galenic System, 373; Guillaume de Baillou, 373; Respiratory Diseases, 373; Pleurisy, 374; Franciscus de le Boë and the Iatrochemical Viewpoint, 374; Tuberculosis, 375; Thomas Sydenham and the Descriptive Technic, 375; Cardiovascular Disease, 380; Lead Poisoning, 381; Deficiency Diseases, 382.	
EIGHTEENTH CENTURY	383
Necessity for New Reference Points in Medicine, 383; Decline of Iatrochemistry and Iatrophysics and the Rise of Vitalism, 385; Hermann Boerhaave and the Continuation of the Bedside Technic, 386; François de Sauvages and the Expansion of Symptomatology, 387; William Cullen and His Relation to Hermann Boerhaave, 388.	
BACKGROUND OF EARLY AMERICAN MEDICINE.	388
Ideas on Fevers, 388; Respiratory Diseases, 393; Gastrointestinal Diseases, 400; Yellow Fever, 403; Nephritis, Diabetes, 404; Gout, 405; Rheumatism, 406; Cardiac Disease, 407; Dietary Deficiencies, 408; Rabies and Tetanus, 413; Erysipelas, 415; Plague, 415; Smallpox, 417.	
NINETEENTH CENTURY	423
Parisian School of Anatomic Diagnosis, 423; German Physiologic School, 452; Bacteriologic School, 470; Syncretic or Modern Medicine, 475.	

8

Neurology and Psychiatry

PRE-GRECIAN PERIOD.	487
Primitive Neuropsychiatric Concepts, 487; Neurology and Psychiatry Among the Babylo-Assyrians and Egyptians, 488.	

NEUROLOGY AND PSYCHIATRY OF THE GREEKS	489
Genesis of Philosophic Neurophysiologic Concepts, 489; Hippocratic Neurology, 490.	
NEUROLOGY AND PSYCHIATRY IN ROME	496
Alexandrian Medical Sects; Apoplexy and Paralysis, 497; Aesclepiades, 497; Cassius Iatrosophista, 499; Celsus, 499; Archigenes, 506; Aretaeus, 508; Soranus and Caelius Aurelianus, 519; Galen, 523.	
NEUROLOGY AND PSYCHIATRY OF THE BYZANTINES	527
Posidonius and Localization of the Faculties, 527; Oribasius and Senile Cerebral Atrophy, 527; Hellebore and Melanogogues, 528; Theophilus Protospatharius and Further Speculations on the Localization of the Faculties, 529; Paul of Aegina, 529; Nonnus and the Ventricular System of Localization of the Faculties, 535.	
THE MIDDLE AGES	535
The Arabs; Rhazes, 535; Serapion Senior, 537; Haly Abbās, 537; Avicenna, 538; Neuropsychiatry in Medieval Europe, 538.	
SIXTEENTH CENTURY	539
Neurology in the Sixteenth Century, Concern with Structural Involvement, 539; Psychiatry in the Sixteenth Century, 541.	
SEVENTEENTH CENTURY	543
Neuropathology in the Seventeenth Century, 543; Clinical Neurology in the Seventeenth Century, Nosology, 545; Psychiatry in the Seventeenth Century, 548.	
EIGHTEENTH CENTURY	550
Neuropsychiatric Disease "Entities," 550; Eighteenth-century Neuropathology, 551; Eighteenth-century Clinical Considerations, 552; Psychiatry in the Eighteenth Century, 558.	
NINETEENTH CENTURY	563
Neuropathology in the Nineteenth Century, 563; Neurology, 570; Psychiatry, 593.	

9

Venereology

VENEREOLOGY AND DERMATOLOGY	601
THE QUESTION OF THE ANTIQUITY OF SYPHILIS	601
VENEREAL DISEASE IN THE CLASSIC PERIOD	607
The Leprosy Complex, 612; Separation of Venereal Diseases into Local and General Complaints, 617.	

THE MORBUS GALLICUS	618
Pathology of the Morbus Gallicus, 623; Sixteenth-century Methods of Treating the Morbus Gallicus, 625; Infantile Infection, 628.	
FORMATION OF THE SYPHILIS-GONORRHEA COMPLEX.	631
Other Diseases Confused with the Syphilis-gonorrhea Complex. Frambesia, 635; Glanders, 636; Separation of Leprosy from Syphilis, 637; Separation from Variola, 638.	
CHANCROID, LYMPHOGRANULOMA INGUINALE, GRANULOMA INGUINALE, AND GANGRENOUS BALANTIS.	639
SEPARATION OF GONORRHEA FROM THE SYPHILIS-CHANCROID COMPLEX. .	641
Further Development in the Understanding of Gonorrhea, 645; Further Evolution of Knowledge Concerning Syphilis, 648.	

10

Dermatology

CLASSIC DESCRIPTIVE PERIOD OF DERMATOLOGY.	662
GALENIC PERIOD.	665
SYMPTOMATIC PERIOD OF DERMATOLOGY.	667
ANATOMIC AND PHYSIOLOGIC INFLUENCES	668
DERMATOLOGY BASED UPON PATHOLOGY.	675
ETIOLOGIC PERIOD	683

11

Pediatrics

PEDIATRICS IN PRE-HIPPOCRATIC TIMES, MESOPOTAMIA, AND EGYPT . . .	691
GREECE.	692
HIPPOCRATIC PEDIATRICS	693
POST-HIPPOCRATIC PEDIATRICS; CELSUS	697
SORANUS AND THE BYZANTINES.	699
ARABIC PEDIATRICS.	705
MEDIEVAL AND RENAISSANCE PEDIATRICS	706
Infant Feeding in the Middle Ages and Renaissance, 709.	
PEDIATRICS IN THE SEVENTEENTH CENTURY, SOCIAL CIRCUMSTANCES. . .	712
Organization of Formal Seventeenth-century Pediatrics, 713.	

PEDIATRICS IN THE EIGHTEENTH CENTURY.	727
The Wet Nurse, 728; The Foundling System, 729; Diseases Due to Prenatal Influences, 730; Infections, 740; Rickets, 748; Endocrine Disorders, 748.	

PEDIATRICS IN THE NINETEENTH CENTURY.	748
Diseases Due to Prenatal Influences, 751; Infections, 756; Metabolic and Nutritive Disorders, 783.	

12

Surgery

PRIMITIVE SURGERY	793
Trephining, 793.	
EGYPTIAN SURGERY.	795
SURGERY IN GREECE	797
General Principles in Hippocratic Surgery, 797.	
SURGERY IN ROME	807
Surgical Principles in Celsus, 809; Soranus on Fractures, 813; Caelius Aurelianus (Soranus) on the Orthopedic Complex Called Sciatica, 813; Soranus on Amputation of the Breasts, 814; Aretaeus and General Surgical Principles, 815; Separation of Surgery from Medicine, 817; Galen, 817; Surgery Among the Hindus, 819.	
BYZANTINE SURGERY.	820
Antyllus, 820; Paul, 821.	
ARABIC SURGERY.	826
Rhazes on Surgical Principles, 826; Haly Abbas and Avicenna, 827; Albucasis, General Surgical Principles, 828.	
EARLY ITALIAN SURGERY; THE SALERNITAN PERIOD	830
SEPARATION OF SURGERY AND MEDICINE.	833
SURGERY DURING THE BEGINNINGS OF ANATOMY; BOLOGNA AND THE DIFFUSION OF ITALIAN SURGERY TO FRANCE	835
THE PROFESSIONAL CASTE SYSTEM OF PARIS; PHYSICIANS, SURGEONS OF THE LONG ROBE, SURGEONS OF THE SHORT ROBE OR BARBER-SUR- GEONS, AND LITHOTOMISTS OR OCULISTS	839
GUNSHOT WOUNDS	840
FIFTEENTH-CENTURY SURGERY.	840

SIXTEENTH-CENTURY SURGERY.	842
Gunshot Wounds; Bartolomeo Maggi, 842; The Ligature, Hieronymus Brunschwig on Hemostasis, 843; Hans von Gerssdorff, 844; Ambroise Paré on Surgical Principles, 844; Paré on Orthopedics, 846; Neurosurgery in the Sixteenth Century, 846; Operations of Paracentesis and for Hernia in the Sixteenth Century, 849; Lithotomy by the Celsan (Apparatus Minor), Marian Transurethral (Apparatus Major), and Franco's Suprapubic (Apparatus Altus) Approaches, 850; Prostatic Hypertrophy and Stricture, 852; Plastic Surgery, 853; Anatomy and Surgery, 854.	
SEVENTEENTH-CENTURY SURGERY.	855
Orthopedics in the Seventeenth Century, 856; Neurosurgery in the Seventeenth Century, 859; Paracentesis and Thoracentesis, 861; Hernia, 861; Lithotomy: Introduction of the Lateral Operation of "Frère" Jacques, 862; Proctology, Oncology, and Plastic Surgery, 864.	
EIGHTEENTH-CENTURY SURGERY.	864
General Surgical Principles in the Eighteenth Century, 866; Aneurysm, 868; Amputations, 870; Orthopedics, 871; Neurosurgery, 875; Pneumothorax and Paracentesis, 883; Hernia, 884; Operations on the Kidney, 886; Lithotomy, 887; Proctology and Oncology, 888.	
NINETEENTH-CENTURY SURGERY.	889
European Influences in the Development of Surgery in America, 889; Nineteenth-century Highlights in Surgery, 890; Surgical Principles, 890.	

13

Obstetrics and Gynecology

EARLY KNOWLEDGE.	931
OBSTETRICS AND GYNECOLOGY AT THE TIME OF HIPPOCRATES	933
OBSTETRICS AND GYNECOLOGY AMONG THE INDIANS	937
OBSTETRICS AND GYNECOLOGY IN ROME	937
Aretaeus, Galen, and the Compilers, 944.	
MEDIEVAL OBSTETRICS AND GYNECOLOGY	948
OBSTETRICS IN THE SIXTEENTH AND SEVENTEENTH CENTURIES	949
GYNECOLOGY IN THE SIXTEENTH AND SEVENTEENTH CENTURIES	954
OBSTETRICS IN THE EIGHTEENTH CENTURY.	955
GYNECOLOGY IN THE EIGHTEENTH CENTURY	974

OBSTETRICS IN THE NINETEENTH CENTURY: PUERPERAL FEVER	975
Anticipation and Management of Dystocia, 977; Toxemias of Pregnancy, 983; Other Nineteenth-century Developments in Obstetrics, 984.	
GYNECOLOGY IN THE NINETEENTH CENTURY	987
Ovariectomy, 988; Menstruation, 989; Diseases of the Fallopian Tubes, 990; Pelvic Inflammatory Disease, 991; Hematocele and Ectopic Pregnancy, 992; Plastic Operations, 994; Operations on the Uterus, 995.	

14

Ophthalmology

ANTIQUITY OF THE SPECIALTIES	1005
OPHTHALMIC DISEASE CATEGORIES AND THERAPEUTIC PROCEDURES OF THE ANCIENT PERIOD.	1006
OPHTHALMOLOGIC ENTITIES AND PRACTICE IN THE MIDDLE AGES.	1011
OPHTHALMOLOGY IN THE SIXTEENTH AND SEVENTEENTH CENTURIES.	1019
EIGHTEENTH-CENTURY OPHTHALMOLOGY.	1022
Anatomic Considerations, 1022; Physical and Physiologic Considerations, 1024; Clinical Considerations, 1025.	
NINETEENTH-CENTURY OPHTHALMOLOGY.	1032
Anatomic Considerations, 1032; Physical Considerations, 1034; Physiologic Considerations of the First Half of the Nineteenth Century, 1035; Physiologic Developments in the Period from 1850 to 1875, 1041; Diagnostic Aids, 1045; Glaucoma, 1047; Cataract, 1047; Clinical Refraction, 1048; Entoptic Phenomena, 1048; Abnormal Ocular Movements and Positions, 1048; Infectious Diseases, 1049; Noninflammatory Corneal Involvements, 1050; Ophthalmologic Complaints in General Systemic Alterations, 1050.	

15

Otology and Rhinolaryngology

ANCIENT OTOTOLOGY	1057
ANCIENT RHINOLOGY AND LARYNGOLOGY.	1058
Hippocrates, 1059; Tracheotomy, 1060; Celsus, 1060; Archigenes, 1061; Galen, 1061.	
OTOLOGY IN THE MIDDLE AGES.	1061
MEDIEVAL RHINOLOGY AND LARYNGOLOGY.	1062
OTOLOGY IN THE SIXTEENTH AND SEVENTEENTH CENTURIES	1063
Anatomy, 1063; Physiology, 1064; Clinical Otology, 1064.	

LARYNGOLOGY AND RHINOLOGY IN THE SIXTEENTH AND SEVENTEENTH CENTURIES	1065
Anatomy, 1065; Physiology, 1066; Clinical Rhinolaryngology, 1066.	
OTOLOGY IN THE EIGHTEENTH CENTURY.	1067
Anatomy, 1067; Physics of Sound, 1068; Physiology, 1069; Clinical Otology, 1071.	
RHINOLARYNGOLOGY IN THE EIGHTEENTH CENTURY.	1072
Anatomy and Physiology, 1072; Clinical Conditions and Their Treatment, 1074.	
NINETEENTH-CENTURY OTOLOGY	1075
Anatomy, 1075; Physical Considerations, 1076; Physiologic Considerations, 1077; Clinical Considerations, 1083.	
RHINOLARYNGOLOGY IN THE NINETEENTH CENTURY.	1085
Anatomic Considerations, 1085; Physiologic Considerations, 1087; Clinical Considerations, 1092.	
CONCLUSION	1103
INDEX OF PERSONAL NAMES IN TEXT.	1105
SUBJECT INDEX	1145
